## OVERVIEW

---

We design, deploy, and operate enterprise IT for federal and commercial customers. On-premises, cloud, or at the tactical edge — the architecture has to work when the network does not.

## CORE COMPETENCIES

---

- Cloud & Infrastructure — AWS GovCloud, Azure Government, and hybrid landing-zone designs aligned to FedRAMP High, IL5, and IL6 baselines.
- Network Engineering — Routing, switching, SD-WAN, and zero-trust segmentation engineered for real-world latency.
- Managed Services — 24x7 NOC and Tier-2/Tier-3 engineering with documented SLAs, runbooks, and escalation paths.
- Modernization & Migration — Lift-shift-and-modernize programs that retire technical debt rather than re-platform it.

## DIFFERENTIATORS

---

- Senior, cleared people on contract — never a junior bait-and-switch.
- Written commitments at every milestone, with documented rollback paths.
- Self-perform on the critical path; vetted partners on the rest.
- Past-performance references furnished on qualified inquiries within 48 hours.

## PAST PERFORMANCE

---

### **AWS GovCloud Landing Zone — Federal Civilian Agency (2024)**
