OVERVIEW

Special Projects is where Black Fox takes on the work that does not fit neatly under construction, IT, cyber, or continuity. Website development, product UI/UX design, custom cloud builds, independent auditing, financial management support, and discreet senior-team engagements.

CORE COMPETENCIES

- Website Development — Marketing sites, agency portals, and citizen-facing applications with WCAG 2.2 AA and Section 508 conformance.
- UI / UX Design — Discovery, journey mapping, design systems, and high-fidelity prototypes.
- Special Cloud Projects — Custom cloud builds — mission-specific data platforms, analytics workspaces, agency-owned LLM gateways.
- Auditing Services — Independent IT, program, financial, and compliance audits aligned to AICPA, GAGAS, and NIST.
- Financial Management — CFO-grade support: budget formulation, IGCEs, DCAA-compliant accounting, and earned-value reporting.
- Rapid Prototyping & Surge Ops — Concept-to-prototype in 90 days; 72-hour senior surge cells when the program cannot wait.

DIFFERENTIATORS

- Senior, cleared people on contract — never a junior bait-and-switch.
- Written commitments at every milestone, with documented rollback paths.
- Self-perform on the critical path; vetted partners on the rest.
- Past-performance references furnished on qualified inquiries within 48 hours.
